

## Silicone Wound Contact Dressing

Our **Silicone Wound Contact Dressing** is designed to enhance patient comfort and provide clinicians with versatile options. Available in both single-sided and double-sided versions, this dressing offers unique benefits for various clinical applications.

### Key Features:

- **EdgeSeal<sup>®</sup> Technology:** Ensures an ultra-slim profile (0.17mm) in contact with the skin, reducing rucking and rolling at the edges.
- **2mm Perforations:** Allows for the free flow of exudate into the secondary dressing.
- **Slim Profile:** Creates a slimmer overall profile when combined with a secondary dressing.
- **Versatile Options:** Available in 12 different sizes, including 17.5 x 25 cm and 20 x 30 cm.

### Benefits:

- **Patient Comfort:** The slim line profile increases comfort during use.
- **Clinician Versatility:** A range of sizes and versions to suit various clinical needs.
- **Effective Exudate Management:** Perforations ensure efficient exudate transfer to the secondary dressing.
- **Secure Fit:** **EdgeSeal<sup>®</sup> Technology** minimizes edge rolling and maintains a secure fit.
- This range of Silicone Wound Contact Dressings is designed to meet the diverse needs of both patients and healthcare providers, ensuring effective wound management and increased comfort.
